- **Collaborated with a cross-functional team to improve web accessibilit**y, resulting in a 40% increase in positive user feedback regarding site usability.
- **Directed unit and integration testing for Reac**t, reducing production issues by 25%, bolstering site reliability.

Front-End Engineer

HCLTech • Remote   09/2023 - Present

- **Developed and deployed 5 interactive web applications using HTML5, CSS3, SASS and JS(ES7)**, increasing user engagement by 20%
- **Built and maintained projects using ReactJS, jQuery, and Web3Forms API for client communication**, improving client response time by **20%** and reducing communication errors.
- **Created a live coding editor with real-time HTML5, CSS3, and JS preview, leveraging Prism.js for syntax highlighting**, reducing code feedback time by **30%** during development.
- **Designed a responsive cash register application** that calculates change accurately and provides intuitive UX for retail environments, increasing customer satisfaction and reducing transaction errors by **15%**.

Front End Developer

ONYC Hair • Ajah, Lagos   09/2024 - 01/2025

Front-End Developer

- Led the development of responsive and dynamic user interfaces using ReactJS, Webflow, Node.js, and CSS, enhancing site functionality and user engagement.
- Improved website performance, optimizing load times and ensuring seamless interactions across devices.
- Successfully collaborated with cross-functional teams to design and launch a product page, resulting in a 25% increase in user engagement.
- Maintained and updated the company's website, ensuring the application of best practices for front-end development and design consistency.

Skills

HTML5, CSS3, JS (ES6), Debugging and Troubleshooting, ReactJS, RESTful APIs, Task Runners (Gulp, npm Scripts), Progressive Web Applications (PWA), Node.js, PHP, JSON and xml utilization, jQuery usage, SASS, TailwindCSS

Education

Data Structures & Algorithms

Coursera • Online   09/2022

*I earned certifications in the **Data Structures and Algorithms and API tracks**, achieving **Top Completion in the Data Structures and Algorithms.** This involved over 1,000 hours of hands-on learning, where I tackled challenges ranging from algorithm optimization to building responsive, user-friendly web applications.*
